

FuelCOUNTER© for Aviation

Fuel Inventory & Accounting Management System

FuelCOUNTER© is a three tier enterprise level software system that manages fuel accounting and inventory management functions at large and small airport sites.

FuelCOUNTER© offers a cost effective software solution for airport fuel managers that allows superior control over fuel resources, greater savings in the cost of fueling operations and easy interfaces to other fuel management modules operating at the tank farm, fueling dispatch, data capture and corporate accounting systems.

FuelCOUNTER© is the only system of it's kind to offer Fueling Contract Management that prevents fueling for parties with no valid fuel supply contract.

Logiccraft Corporation

JFK International Airport, P.O. Box 300624, Jamaica, NY 11430; Tel: (718)632-0100, Fax: (718)632-2750; e-mail: marketing@logiccraft.net

FuelCOUNTER© Features

- 1.1 Allows for the management of fueling operations for one single or multiple airports from one central location.
- 1.2 Allows for the manual and digital posting of fueling tickets, receipts, transfers, etc.
- 1.3 Validates net/gross coefficients for fuel receipts.
- 1.4 Computes and reconciles fuel inventories by customer, suppliers and account.
- 1.5 Manages multiple tank groups and fuel products.
- 1.6 Reconciles dispensal tickets vs. truck sheets.
- 1.7 Fuel Contract Management.
- 1.8 Generates invoices.
- 1.9 Interfaces to corporate enterprise systems.
- 1.10 Generates 720TO reports to IRS.
- 1.11 Generates a multitude of management reports.
- 1.12 Allows for the exportation of data to other systems.
- 1.13 FuelCOUNTER© operates under the Windows®2000/XP/2003 Server platform.
